

ZYVORAI LABS · CUSTOMER DOCUMENTATION

# Zyvor Fabric

Getting Started

2026-07-26

## What you need

---

See [Admin basics](#) for ports and auth. Summary:

Open the Fabric web UI against the daemon API ( `:9095` ).

## 1. Open the product

---

Open the Fabric web UI against the daemon API ( :9095 ).

## 2. Sign in / authenticate

---

External OIDC + JWT bearer.

### 3. Orient yourself

---

Use the quick map on the [customer docs home](#), then open the home surface ( / ).

## 4. First workflows

---

Follow [Common workflows](#) for the shortest useful paths.

## Next steps

- 

Zyvor Fabric is organized by navigation groups (sidebar, desktop nav, or CLI command groups). Use search / command palette when available.

# Surfaces

| Need          | Path                    |
|---------------|-------------------------|
| Dashboard     | /                       |
| VMs           | /vms                    |
| DRS / FT      | /drs , /fault-tolerance |
| Site Recovery | /site-recovery          |
| Settings      | /settings               |

## Browse vs act

---

Inventory and status views are safe to explore. Mutating actions (deploy, migrate, sign, remediate) follow role gates and confirmation dialogs — review impact first.
